HC, HSI Series Impact Crusher

HC、HSI欧星系列反击式破碎机

Shanghai Sanme Mining Machinery Corp.,Ltd. is a Sino-German JV holding company. By many years experience, Sanme has developed the HC Series Impact Crushers with advanced level. The crushing chamber is optimized, the rotor is designed in heavy duty, and the fixing device of blow bar is improved to provide a higher reliability degree. Humanized design makes the maintenance more convenient.

The Andrew style HC, HSI Series Impact Crushers can be used in primary, secondary and tertiary crushing of stone. They are widely used in the field of cement, metallurgy, chemical, etc.

Features and Benefits

主要特点和优点

1. High efficiency and low energy consumption. The machine is equipped with a high-speed motor and a large roller, which can process a large amount of material in a short time, reducing energy consumption and increasing production efficiency.

2. Stable operation and long service life. The machine is made of high-quality materials and has a sturdy structure, which can ensure stable operation and a long service life.

3. Easy maintenance and repair. The machine has a simple structure and is easy to disassemble and assemble, which can reduce maintenance and repair costs.

4. Wide application range. The machine can be used to process various types of materials, such as cement, clinker, and slag, and can be applied in various industries, such as construction, metallurgy, and chemical industry.

5. High safety and reliability. The machine is equipped with a safety protection system, which can ensure the safety of operators and prevent accidents.

6. Low noise and vibration. The machine is designed with a low-noise and low-vibration structure, which can reduce noise and vibration during operation, improving the working environment.

Features and Benefits

主要特点和优点

4 Heavy rotor design and unique blow bar fixing system provide reliability

HC, HSI series impact crushers adopt heavy rotor design, which not only improves reliability, but also increases moment of inertia of rotor and capacity. The fixing of blow bar is improved to make the exchange easy and fixing reliable.

转子重型化设计, 改进板锤固定方式, 增加了可靠性

HC、HSI 系列反击式破碎机转子采用重型化设计, 不但提高了可靠性, 还提高了转子的转动惯量, 可以提高破碎机的处理能力; 改进了板锤的固定方式, 使板锤的更换更方便, 固定更可靠。

5 Reliable overload and tramp iron protection device

For the protection of the rotor body and blow bars, the HC, HSI series impact crushers optimize overload and tramp iron protection device. The impact aprons retract under excessive load. As soon as the load value returns to normal, the impact aprons return to normal position.

可靠的过载和过铁保护装置

HC、HSI 系列反击式破碎机为了保护转子主体和板锤, 优化了过载和过铁保护装置, 反击板在过载的情况下可以回缩, 一旦载荷值恢复正常, 反击板会回到预设位置并正常工作。

6 Easy to maintain, high reliability and safety

The hydraulic power unit is used by HC, HSI series impact crusher for easy adjustment of setting. It is convenient for checking, maintenance and changing wear parts.

方便维护, 安全可靠

HC、HSI 系列反击式破碎机采用液压助力设计, 大大方便调整排矿口, 便于打开上机架进入破碎机内部进行检查、维修和更换。
